THE MOWER MISSION

DID YOU KNOW
THAT SOME
OF THE MOST
SIGNIFICANT
THREATS TO
YOUR HEALTH
COULD BE IN
YOUR OWN HOME,
FOUND IN THE
VERY PRODUCTS
THAT YOU USE
EVERY DAY?

A lifelong passion

Over three decades ago Tom Mower, Sr. came to a shocking realization: Many of the same harsh chemicals used to manufacture industrial-strength cleaners and detergents were used to produce common household personal care items. These were chemicals reported to pose health risks when they came into contact with the skin. Why would personal care products contain chemicals that do so much damage?

Tom was determined to spread the word and find alternatives to these potentially harmful ingredients. Thus began a quest that would produce a historic explosion of activity—a new awakening—in the health and wellness community and made Tom Mower a pioneer in this movement.

Thus was born the Mower Mission!

Sisel KAFFÉ™

fit & he
Thermog

In order to brew a world-class cup of coffee, you've got to start with a world-class blend of coffee beans. That's why we searched from the remote jungles of Brazil and Panama to the hills of Hawaii for the perfect mix. Our pursuit of the perfect coffee led us to formulate a proprietary blend of coffee beans that includes the rare and highly regarded Panamanian Gesha bean. This exclusive blend combines to form the only mix worthy of the Sisel Kaffé brand.

We then take this incredible blend of beans and mix it with ingredients that experts say, may make it one of the healthiest coffees in the world. Things like Chaga (a plant brimming with antioxidants), Ganoderma, Gotu Kola and Bacopa, combine to provide support for just about every major function of the human body.

After we create our distinct Sisel Kaffé coffee formulas, we then utilize the most robust, controlled and state-of-the-art roasting systems – infrared technology. We roast all of our beans in-house, so we can control the exact amount of roasting needed to create the perfect brew. Only 2% of the coffee beans in the world are roasted with infrared technology, but we think it's worth the expense. Unlike traditional coffee roasters, infrared roasting allows for a more controlled roast assuring that none of the beans are overcooked or burned. It guarantees a coffee that's consistently delicious, aromatic and less acidic.

Better beans and better processing...
it's why, cup after cup, you'll taste the Sisel
Kaffé difference in every coffee we make.
